Join AAHomecare's Educational Teleconference on *The Therapist as the Case Manager/Assessment Skills*. Being a Case Manager takes on a whole new meaning in the home health arena. Therapists are being challenged to assess and address a wider scope of patient issues that the more traditional therapy evaluation visit. This teleconference will review the components of a comprehensive assessment and what the opportunities and challenges are to a home health therapist. We will also:

- Define what it means to be a "case manager" in home health;
- Discuss the regulatory components of a comprehensive assessment;
- Examine where aspects of the traditional therapy assessment can be effectively integrated into the comprehensive assessment; and
- Explore the assessment skills needed by the home health therapist to properly manage patient care.

SPEAKER: Cindy Krafft MS, PT, COS-C, Director of Rehab Services OSF Home Care & VP/Program Chair, Home Health Section – APTA
